- * Voltage Supply: +5V Range: 4.6~5.4V / +12V Range: 11.5V~12.5V
- * Working Temperature: 0~50℃
- * Storage Temperature: -10℃ ~ 60℃
- * Humidity: 10% ~ 90%
- * Total wattage per channel cannot be greater than 25W. When exceeding 25W, power will be shut off due to auto protection.

Aerocool strongly recommends user to turn off the computer before changing fans.

3. Installation

1. Remove one bay cover from your computer.

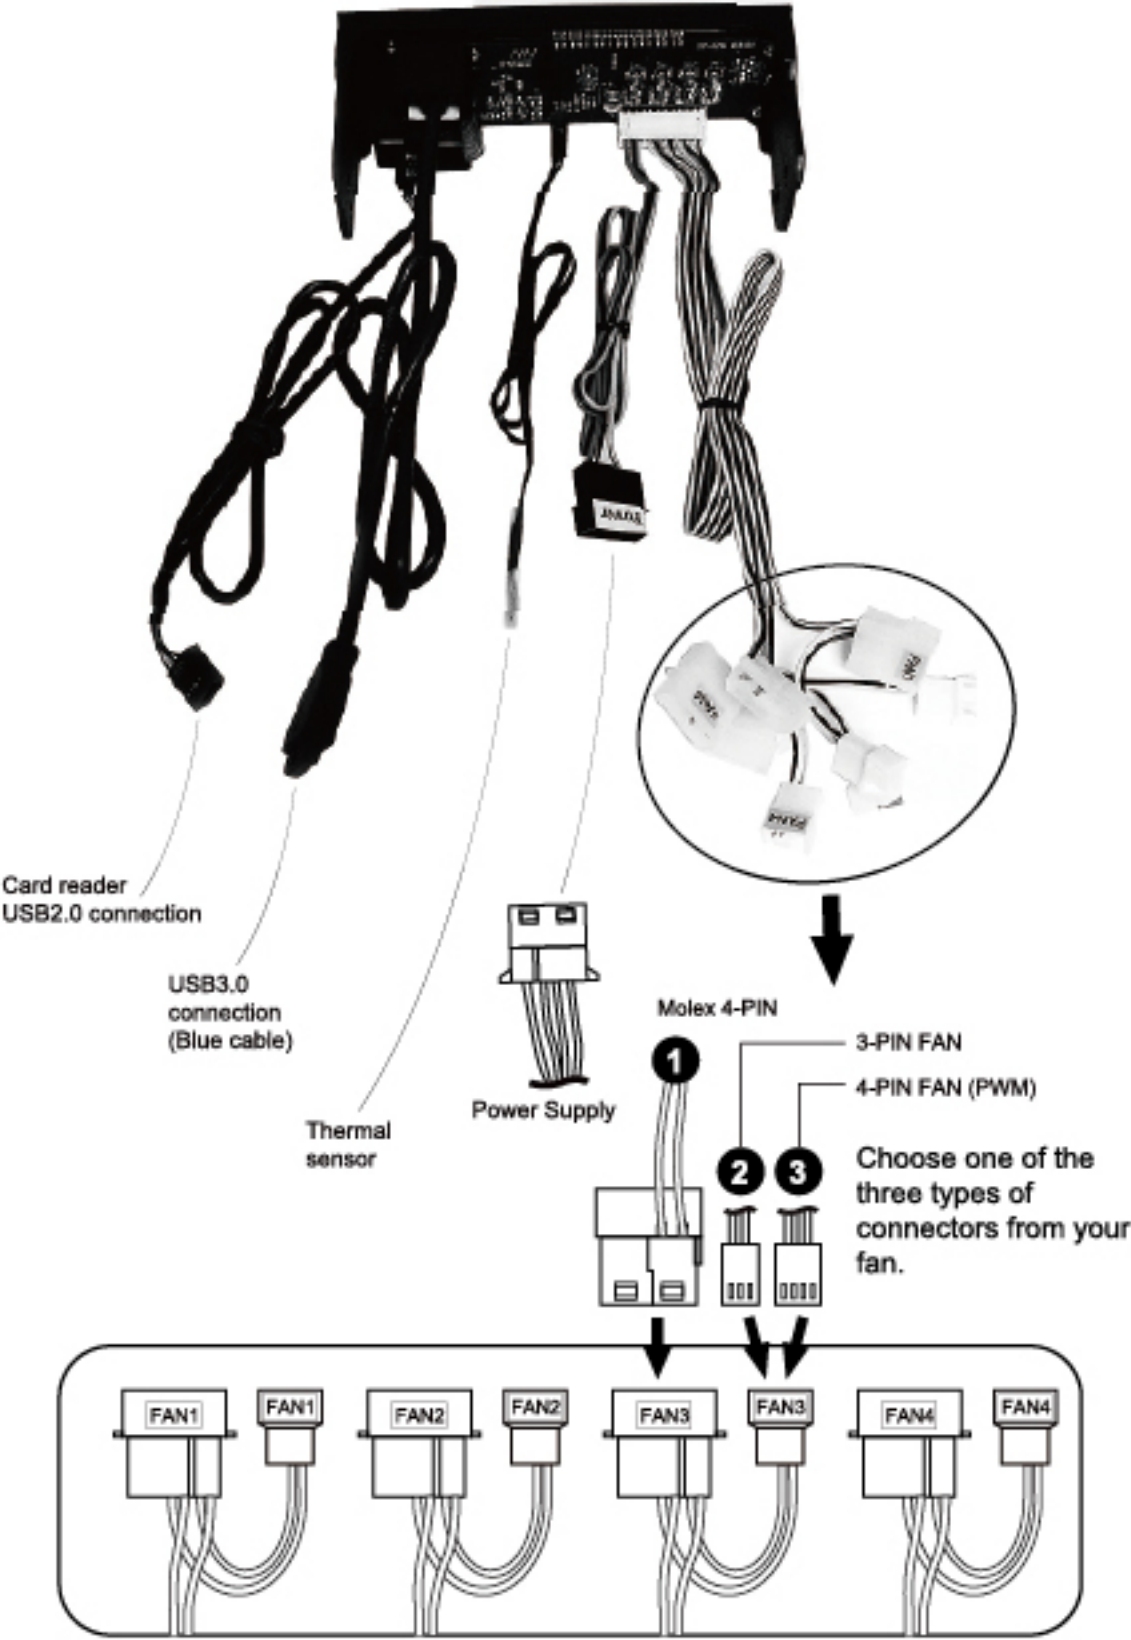

2. Insert CoolTouch-R into the slot.

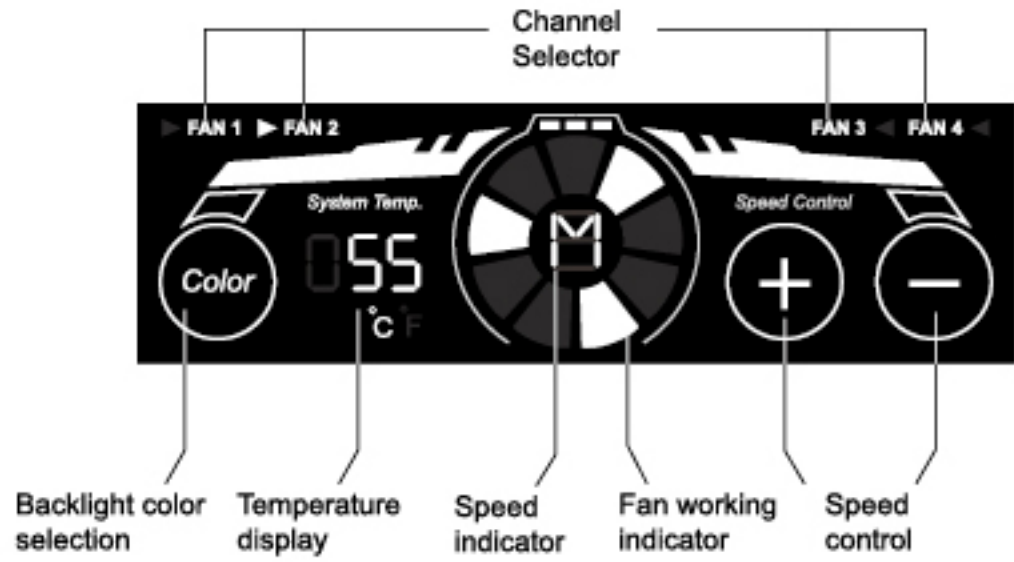

3. Fasten with screws or tool-free lock.

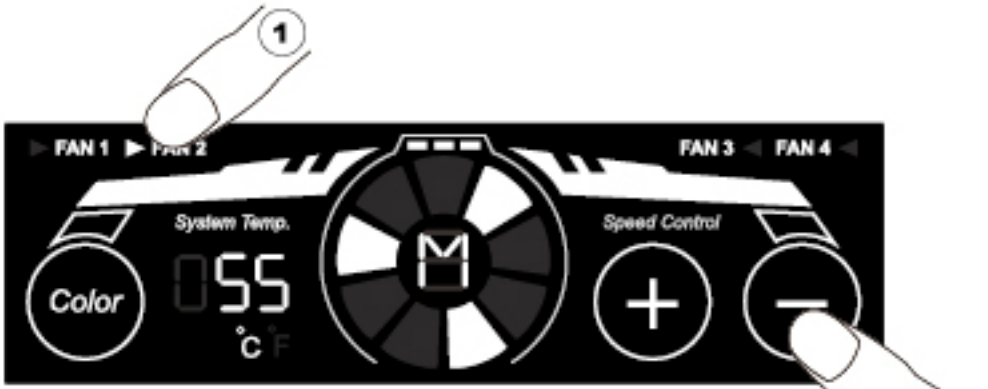

4. Cable connections

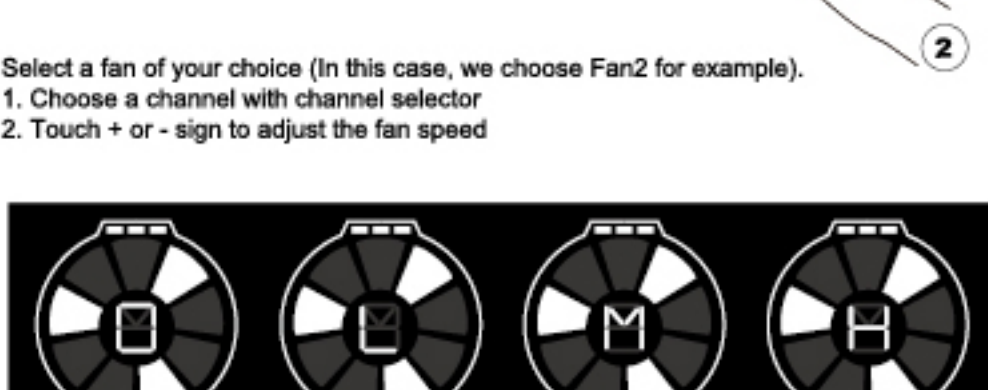

5. Functions

5-1. Set fan speed

1. Choose a channel with channel selector

2. Touch + or - sign to adjust the fan speed

WARNING!

The user is operating at his/her own risk of damaging the electronic components by selecting fan speed to 0 RPM. The user must acknowledge the relationships between the controlled fan/s and the component/s it cools.

5-2. Change backlight color

Touch Color button to rotate through seven color selections including light off function.

Red > Green > Yellow > Blue > Purple > Light blue > White > OFF (Black screen)

5-3. Celsius/Fahrenheit

Touch the digits to switch between Celsius or Fahrenheit

Important

- Under these circumstances your fan may not respond to the fan controller:
1. The fan has a built-in fan speed control
 2. The fan itself has on/off switch
 3. The fan is already controlled by aother fan controller
